COMPUTATION OF FINAL ACCOUNTS

Accounting is the language of Business. Being able to understand this language allows us to analyze our business and interpret our financial statements. The ability to understand accounts gives us a better insight into the world and economy around us.

Final accounts are the accounts prepared at the end of a fiscal year. It gives a precise idea of the financial position of the business/organization to the stakeholders. Financial statements are primarily recorded in a journal; then posted to a ledger; thereafter the final accounts are prepared. Final accounts comprise of trading, profit & loss account and balance sheet. The short-term course will elucidate the basics of accounting and will focus on how to make, analyze and interpret final accounts.
